An additional fee of Rs. 50 shall be charged for the inspection of a boiler on a Sunday, Christmas Day, New Year's Day, Good Friday and King's Birthday. Of the additional fee so charged one-half shall be paid to the Inspector and the balance credited to the Steam Boiler Fund.

Formula for calculating heating surface.

The heating surface for these purposes may be defined generally as the total surface of all plates and tubes exposed to heat on one side and in contact with water on the other, measured on the water side. For Lancashire and Cornish boilers the total heating surface shall include the wetted surface of the furnaces between the end plates and of cross tubes, where fitted, and the part of the external shell below the side flue covers. In estimating the areas, furnaces may be considered as plain cylinders, the area of their wetted surface is to be taken as their mean external circumference $\times$ the length of the boiler between end plates. For the shell the width of that part of the circumference below the flue covers is to be taken as $=2D$, and this width $\times$ the length between end plates is to be taken as the area of shell heating surface. The part of the surface of the back end plate exposed to heat is to be neglected.

The formula for the total heating surface of a Lancashire boiler having plain furnaces without cross-tubes is therefore H. S. in square feet $=2L (3.14d + D)$. L is the length of the boiler between end plates, D is the mean external diameter of the largest belt of shell, d is the diameter of furnace flue all sizes in feet.

For steam and water drums of water tube boilers the heating surface of the drum may be taken as half the external mean circumference into the clear length of drum between the outer brick walls or centres of cross boxes as the case may be. The surface of the tubes may be taken as the external surface of the inclined tubes between tube plate and headers. The heating surface of the headers is to be neglected.

For Marine type boilers the heating surface shall include the wetted surface of the furnaces between the tube plates (considered in the same way as for Lancashire boilers), the wetted surface of the combustion chambers (less the area of the tube holes) and the wetted surface of the tubes between tube plates. The parts of the front tube plate exposed to heat are to be neglected.

For Locomotive type boilers the heating surface shall include the wetted surface of the fire-box above the foundation ring (less the area of the tubes and the fire-hole and ring) and the wetted surface of the tubes between tube plates. The smoke box tube plate is to be neglected.

For vertical boilers of ordinary type the heating surface shall include the wetted surface of the fire-box above the foundation ring (less the area of fire-hole and ring and tube holes, if any) and the wetted surface of any cross or other tubes and uptake below the lowest water level shown in the gauge-glass. For any other heating surface not provided for in the foregoing instructions the same general procedure shall be observed. No deduction should be made for stays, etc., in calculating the heating surface.

Minister in charge: The Hon'ble Sir S. N. Banarji, Kt.

No. 157P.H.—*The 29th January 1923.*—In exercise of the power conferred by section 290 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Government of Bengal (Ministry of Local Self-Government) make the following rules subject to which the Commissioners of the Krishnagar

Municipality may allow communication-pipes to be laid down from the service-pipes of the Commissioners for the purpose of leading water to premises for domestic purposes only :—

Rules.

So long as the Commissioners deem it practicable and consistent with the maintenance of an efficient water-supply, they may allow any owner or occupier of a holding paying a water rate imposed under the provisions of Part VII of the Bengal Municipal Act, 1884, on the annual value of such holding, when such annual value is not less than Rs. 100, to lay down communication-pipes from the service-pipes of the Commissioners for the purpose of leading water to such holding for domestic purposes only, subject to the following rules and conditions :

Provided that no connection shall be allowed to holdings other than masonry buildings without the sanction of the Commissioners at a meeting :—

1. The owner or occupier of any holding requiring water to be laid on to such holding for domestic purposes, or requiring any addition or alteration to an existing water-supply, must apply for the same on a printed form to be supplied, free of cost, at the municipal office.

2. A fee of Rs. 100 must be paid to the Commissioners by such owner or occupier for each connection to a municipal main supply pipe or a common communication-pipe laid in accordance with rule 3 before any work is commenced, such fee to be in addition to all other costs and charges imposed under these rules.

3. Except as provided below each holding must have a separate connection to the municipal main supply-pipe, and extensions from the communication-pipe of one holding to another holding shall not be permitted :

Provided that with the consent of the Commissioners in meeting connections to two or more holdings may be permitted from a common communication-pipe. Any such communication-pipe must be laid in a street or common passage, and a stop-cock and meter as provided for in rule 7 must be fixed on the connection to each holding :

Provided also that no holding shall have more than one separate connection, but if in any case the Commissioners are satisfied that an adequate supply to any holding cannot be given through a single connection, they may sanction a second connection thereto.

4. The owner or occupier of the holding in respect of which the connection is required must pay the entire cost of the connection, including the supply and fixing of the fittings referred to in rule 7, and must also pay the cost of such alterations in, or repairs to, roads, drains, sewers, gas or water mains or pipes, and the cost of such other works as may be necessitated by, or result from, the work of making such connection.

5. The owner or occupier of the holding to which a connection has been given must at any time, on receipt of notice to do so from the Commissioners, pay the entire cost of any repairs or alterations to the connection or any part thereof that the Commissioners may consider necessary to put it into a satisfactory condition or which may be necessitated by any change in the municipal water-works or system of distribution or by the defective condition of the connection or any part thereof or by any other cause whatever.

6. (1) The works required under rules 4 and 5 may, at the option of the Commissioners, either be carried out by the Commissioners themselves at the expense of the owner or occupier of the holding in respect of which the works are required, or may be carried out by a person or firm employed by such owner or occupier and approved by the Commissioners.

(2) No work shall be carried out under sub-rule (1) except under the supervision of a municipal officer.

7. A holding connection shall comprise the following parts of fittings :—

- (a) a brass or gun-metal ferrule inserted in the main supply-pipe ;
- (b) a galvanized iron communication-pipe from the ferrule to the meter ;
- (c) a stop-cock and its surface box ;
- (d) a meter ;
- (e) service-pipes from the stop-cock to the taps ; and
- (f) taps.

8. (1) All the fittings referred to in rule 7 shall be exact duplicates of standard samples kept in the office of the Commissioners, and approved by them in meeting.

(2) All fittings shall be inspected and tested and stamped by an officer of the municipality before being fixed.

(3) If any owner or occupier shall desire to adopt any fitting of a pattern different from the standard patterns he must present such fitting for the approval of the Chairman,

and any fittings so presented may, if considered satisfactory by the Chairman, be stamped, and samples thereof may be purchased and placed among the standard fittings.

9. The holding connection, when fitted in position, must be capable of standing a pressure of 40 feet, and no water shall be supplied until it has stood such a test applied by the Commissioners.

10. The size of the ferrule and the diameter of the communication-pipe referred to in clauses (a) and (b) of rule 7, and the number of taps shall be fixed in accordance with the annual valuation of the holdings as follows:

	Annual valuation of holdings.		Sizes of ferrule.	Diameter of communication-pipe.	Number of taps.

"	2,000 and above special sanction of the Commissioners.				

11. (1) On every communication-pipe a brass or gun-metal stop-cock having the same water-way as such pipe shall be placed as near as practicable to the point where that pipe enters the holding to be supplied.

(2) The stop-cock shall be built in a brick chamber provided with a cast-iron surface cover-box so designed that it can be locked and the key of this box shall remain under the control of the Chairman.

(3) The stop-cock shall be capable of adjustment so that the supply to the holding may be regulated thereby.

12. (1) The meter shall be placed as near to the stop-cock as possible and in a position where it can be conveniently examined.

(2) The meter must be fixed in a brick chamber covered over with a cast-iron surface box of approved pattern.

13. Neither the stop-cock nor the meter must be placed in any private premises.

14. The Commissioners shall depute an authorized person to read every meter not less than once a quarter, and shall give notice to the occupier at least twenty-four hours before the reading is recorded.

15. (1) Every owner or occupier of any holding, in respect of which a connection has been made, under these rules, shall be entitled to a supply of—

(a) two thousand two hundred and fifty gallons of water per quarter per rupee of water tax paid during the quarter;

(b) a further proportionate number of gallons per quarter for every additional fraction of a rupee paid by him quarterly as water-rate in respect of such holding.

(2) For all water in excess of the amount allowed under sub-rule (1) such owner or occupier shall be charged quarterly as follows:—

(d) For any excess quantity of water exceeding twice the amount of the allowance prescribed in sub-rule (1) ...	1	4	0

16. The Commissioners may cut off the connection between any water-works of the municipality and any holding to which water is supplied from such works, or may turn off such supply, in any of the following cases, namely:—

(a) if the holding is unoccupied;

(b) if the occupier refuses to admit any officer duly empowered in that behalf into the holding for the purpose of making any examination or inspection authorized under this Act, or under any by-law or rule framed under this Act, or prevents such officer from making such examination or inspection;

- (c) if the owner or occupier of the holding touches or interferes with his meter in any way except with the permission of the Chairman, or wilfully injures or damages it ;
- (d) if the owner or occupier of the holding wilfully or negligently permits waste of water in such volume as will, in the opinion of the Chairman, endanger the water-supply in the neighbourhood ;
- (e) if the owner or occupier of the holding shall refuse or neglect to pay any of the fees or charges imposed in accordance with these rules for a space of fourteen days after he has been served with a notice of demand for the same ;
- (f) if the owner or occupier of the holding constructs or fixes any cisterns, tanks, reservoirs, taps, pipes or any other works in connection with the water-supply not authorized by these rules ;
- (g) if the pipes, taps, ball-cocks, cisterns, or any other parts of the connection are, in the opinion of the Commissioners at a meeting, in a leaking condition or a state of disrepair :

Provided that such disconnection or turning off of water-supply shall not relieve any person from any liabilities which he may have incurred under these rules.

In the circumstances contemplated in clause (d) an officer authorized by the Commissioners in this behalf by a general order shall have the power to turn off the supply for a period not exceeding eight hours on his previously recording his reason in writing.

17. Every tap shall be of the same size as the pipe to which it is attached and shall be of brass and of the pattern known as "Screw-down." Every tap shall be at least 3 feet above the surface of the ground beneath.

18. No cistern, tank or reservoir of any description which is intended to be supplied with water from the municipal water-works shall be permitted to any holding except with the sanction of the Commissioners in meeting, and such sanction shall distinctly specify the dimensions and capacity of the cistern, tank or reservoir allowed. The inlet to every such cistern, tank or reservoir must be controlled by an efficient ball-cock so that the discharge thereinto is completely stopped when the cistern, tank or reservoir is full. Any taps fed from such cistern, tank or reservoir must be included in the number of taps allowed under rule 10.

19. No connection shall be permitted to any holding unless and until the owner or occupier makes effective provision to the satisfaction of the Commissioners for draining all waste water away.
